

ALiM Academy-UNIMAS Excel Workshops

Tuesday, 6 December 2022, Kuching – Lead Geotechnical Engineer, Edison Lim Kim Ong shared that “While it may appear basic, Excel is actually a powerful tool, especially for those who knows how to use it.”

While it is important to have the right tools, it is just as important to know how to use them correctly. This is the purpose behind ALiM Academy’s series of Excel workshops, jointly organized with UNIMAS since early October.

Microsoft Excel is arguably the most popular and utilized database software for professionals given its versatility. While highly accessible, most are unable to utilize Excel efficiently.

The Excel workshops set about to address such gaps by not only providing a refresher of the basic functions in Excel but also exposure to the more advanced functions for directed usage. The Excel training was delivered by Senior lecturers from UNIMAS’ Faculty of Built Environment in a series of two-day workshops.

As of today, over 70 staff have enrolled in the workshops, held at UNIMAS City Campus at Jalan Tun Ahmad Zaidi Adruce, Kuching.

If you are keen to develop greater mastery over your professional tools, beginning with Excel, there are more sessions planned in the future. You can pose your enquiries or register in future sessions by reaching out to ALiM Academy at alim.academy@maltimur.com.my.
