

## Maltimur Showcases BIM at 11th Malaysian Road Conference & Exhibition 2022 & 4th International Road Federation Asia Pacific Regional Congress

**Friday, 14 October 2022, Kuala Lumpur** – Maltimur showcased its strength in Building Information Modelling (“BIM”) as part of taking an asset lifecycle management approach to infrastructure development and management. This was highlighted at Maltimur’s exhibition at the recent 11th Malaysian Road Conference & Exhibition 2022 and 4th International Road Federation Asia Pacific Regional Congress held from 11 till 13 October 2022 at Kuala Lumpur’s World Trade Centre.

The demonstration of BIM for Pan Borneo Highway Sarawak and the proposed Northern Coastal Highway across Sarawak’s Limbang and Lawas was well received by visitors to Maltimur’s exhibition booth, including senior officials from the Ministry of Works Malaysia, JKR Malaysia and the private sector.

Over 100 local and international companies took part in the 3-day exhibition. In addition, some 1,000 participants attended the premier road conference for Malaysia which saw 95 technical papers presented to support the event’s theme, “Towards Resilient Road Infrastructure”.

Topics discussed included the future of road infrastructure, resilience, sustainability, road safety, and new digital technologies that will transform the roads and mobility sector. The conference provided a forum to showcase best practices, technical innovations, new technologies, cutting-edge research, and case studies.

Maltimur’s delegation of project directors and technical specialists attending the conference was led by Chairman, Ir. Junaidi Sahadan.
